

Swanage Solar Streets

COMMUNITY SOLAR PROJECT

Click [HERE](#) to Register for the Solar Streets Launch Event on 17 March 2021 at 7 pm where we will explain how this community opportunity works

Since Swanage Town Council declared a Climate Crisis in 2019, Sustainable Swanage and the Purbeck Energy Group have been looking at ways to reduce our carbon footprint. We've come up with an initiative to generate our own renewable energy by installing solar PV panels on our roofs at a reduced cost. It's open to anyone in Swanage and the surrounding villages and hopefully will extend to the rest of Purbeck in the future.
